Fitting guide

Lying

Standing

Best practice - product fitting

- Measure around the hips for correct size
- Assess for correct absorbency
- Fold pad lengthways to create bowl shape
- Seal bottom tabs pointing upwards and top tabs pointing downwards
- Ensure a close fit is achieved

- Never place one pad inside another to increase absorbency
- Never use talc, as it reduces the absorbency of the product
- When creams are prescribed, use sparingly to ensure the product works effectively
